5 A. To protect the public health and safety, the general regulations
6 adopted by the board pursuant to section 11-821, subsection B, if approved
7 by unanimous vote of the board of supervisors, may provide that, except as
8 provided in subsection ~~D~~ and subsection ~~E~~, paragraph 1 of this
9 section, the board shall not approve a final plat for a subdivision
10 composed of subdivided lands, as defined in section 32-2101, located
11 outside of an active management area, as defined in section 45-402, unless
12 one of the following applies:

13 1. The director of water resources has determined that there is an
14 adequate water supply for the subdivision pursuant to section 45-108 and
15 the subdivider has included the report with the plat.

16 2. The subdivider has obtained a written commitment of water
17 service for the subdivision from a city, town or private water company
18 designated as having an adequate water supply by the director of water
19 resources pursuant to section 45-108.

20 B. EXCEPT AS PROVIDED IN SUBSECTION D OF THIS SECTION AND
21 SUBSECTION E, PARAGRAPH 1 OF THIS SECTION, IF THE DIRECTOR OF WATER
22 RESOURCES HAS GIVEN WRITTEN NOTICE PURSUANT TO SECTION 45-108, SUBSECTION
23 H THAT A COUNCIL HAS ADOPTED A MANDATORY WATER ADEQUACY REQUIREMENT, THE
24 BOARD OF SUPERVISORS MAY NOT APPROVE A FINAL PLAT FOR A SUBDIVISION
25 COMPOSED OF SUBDIVIDED LANDS AS DEFINED IN SECTION 32-2101 THAT ARE
26 LOCATED WITHIN A RURAL GROUNDWATER MANAGEMENT AREA, UNLESS ONE OF THE
27 FOLLOWING APPLIES:

32 SERVICE FOR THE SUBDIVISION FROM A CITY, TOWN OR PRIVATE WATER COMPANY
33 DESIGNATED AS HAVING AN ADEQUATE WATER SUPPLY BY THE DIRECTOR OF WATER
34 RESOURCES PURSUANT TO SECTION 45-108.

35 ~~B.~~ C. If the board unanimously adopts the provision authorized by
36 subsection A of this section:

37 1. The board may include in the general regulations an exemption
38 from the provision for a subdivision that the director of water resources
39 has determined will have an inadequate water supply because the water
40 supply will be transported to the subdivision by motor vehicle or train if
41 all of the following apply:

42 (a) The board determines that there is no feasible alternative
43 water supply for the subdivision and that the transportation of water to
44 the subdivision will not constitute a significant risk to the health and
45 safety of the residents of the subdivision.

1 (b) If the water to be transported to the subdivision will be
2 withdrawn or diverted in the service area of a municipal provider as
3 defined in section 45-561, the municipal provider has consented to the
4 withdrawal or diversion.

5 (c) If the water to be transported is groundwater, the
6 transportation complies with the provisions governing the transportation
7 of groundwater in title 45, chapter 2, article 8.

8 (d) The transportation of water to the subdivision meets any
9 additional conditions imposed by the county.

10 2. The board shall promptly give written notice of the adoption of
11 the provision to the director of water resources, the director of
12 environmental quality and the state real estate commissioner. The notice
13 shall include a certified copy of the provision and any exemptions adopted
14 pursuant to paragraph 1 of this subsection. Water providers may be
15 eligible to receive monies in a water supply development fund, as
16 otherwise provided by law.

17 3. The board shall not rescind the provision or amend it in a
18 manner that is inconsistent with subsection A of this section. If the
19 board amends the provision, it shall give written notice of the amendment
20 to the director of water resources, the director of environmental quality
21 and the state real estate commissioner. The board may rescind an
22 exemption adopted pursuant to paragraph 1 of this subsection. If the
23 board rescinds the exemption, it shall give written notice of the
24 rescission to the director of water resources, the director of
25 environmental quality and the state real estate commissioner, and the
26 board shall not readopt the exemption for at least five years after the
27 rescission becomes effective.

28 4. If the board approves a subdivision plat pursuant to subsection
29 A, paragraph 1 or 2 of this section, the board shall note on the face of
30 the plat that the director of water resources has reported that the
31 subdivision has an adequate water supply or that the subdivider has
32 obtained a commitment of water service for the proposed subdivision from a
33 city, town or private water company designated as having an adequate water
34 supply pursuant to section 45-108.

35 5. If the board approves a subdivision plat pursuant to an
36 exemption authorized by paragraph 1 of this subsection or granted by the
37 director of water resources pursuant to section 45-108.02 or 45-108.03:

38 (a) The board shall give written notice of the approval to the
39 director of water resources and the director of environmental quality.

41 that the director of water resources has determined that the water supply
42 for the subdivision is inadequate and a statement describing the exemption
43 under which the plat was approved, including a statement that the board or
44 the director of water resources, whichever applies, has determined that
45 the specific conditions of the exemption were met. If the director of

1 water resources subsequently informs the board that the subdivision is
2 being served by a water provider that has been designated by the director
3 as having an adequate water supply pursuant to section 45-108, the board
4 shall record in the county recorder's office a statement disclosing that
5 fact.

6 ~~C.~~ D. Subsection A of this section does not apply to:

7 1. A proposed subdivision that the director of water resources has
8 determined will have an inadequate water supply pursuant to section 45-108
9 if the director grants an exemption for the subdivision pursuant to

11 an exemption pursuant to section 45-108.03.

12 2. A proposed subdivision that received final plat approval from
13 the county before the requirement for an adequate water supply became
14 effective in the county if the plat has not been materially changed since
15 it received the final plat approval. If changes were made to the plat
16 after the plat received the final plat approval, the director of water
17 resources shall determine whether the changes are material pursuant to the
18 rules adopted by the director to implement section 45-108. If the county
19 approves a plat pursuant to this paragraph and the director of water
20 resources has determined that there is an inadequate water supply for the
21 subdivision pursuant to section 45-108, the county shall note this on the
22 face of the plat.

23 ~~D.~~ E. If the subdivision is composed of subdivided lands as
24 defined in section 32-2101 outside of an active management area and the

27 NOTICE PURSUANT TO SECTION 45-108, SUBSECTION H:

28 1. If the director of water resources has determined that there is
29 an adequate water supply for the subdivision pursuant to section 45-108 or
30 if the subdivider has obtained a written commitment of water service for
31 the subdivision from a city, town or private water company designated as
32 having an adequate water supply by the director of water resources
33 pursuant to section 45-108, the board shall note this on the face of the
34 plat if the plat is approved.

35 2. If the director of water resources has determined that there is
36 an inadequate water supply for the subdivision pursuant to section 45-108,
37 the board shall note this on the face of the plat if the plat is approved.

31 pursuant to this subsection with respect to the sale or lease of
32 subdivision lots requires proof that the real estate licensee or other
33 licensed professional knew or with the exercise of reasonable diligence
34 should have known that property ~~which~~ THAT the licensee listed or for

38 E. A creation of six or more lots, parcels or fractional interests
39 in improved or unimproved land, lots or parcels of any size is subject to
40 this article except when:

42 a partition basis, thirty-six acres or more in area of land located in
43 this state, including to the centerline of dedicated roads or easements,
44 if any, contiguous to the land in which the interests are held.

1 2. The lots, parcels or fractional interests are the result of a
2 foreclosure sale, the exercise by a trustee under a deed of trust of a
3 power of sale or the grant of a deed in lieu of foreclosure. This
4 paragraph does not allow circumvention of the requirements of this
5 article.

6 3. The lots, parcels or fractional interests are created by a valid
7 order or decree of a court pursuant to and through compliance with title
8 12, chapter 8, article 7 or by operation of law. This paragraph does not
9 allow circumvention of the requirements of this article.

10 4. The lots, parcels or fractional interests consist of interests
11 in any oil, gas or mineral lease, permit, claim or right therein and such
12 interests are regulated as securities by the United States or by this
13 state.

14 5. The lots, parcels or fractional interests are registered as
15 securities under the laws of the United States or the laws of this state
16 or are exempt transactions under section 44-1844, 44-1845 or 44-1846.

17 6. The commissioner by special order exempts offerings or
18 dispositions of any lots, parcels or fractional interests from compliance
19 with this article on written petition and on a showing satisfactory to the
20 commissioner that compliance is not essential to the public interest or
21 for the protection of buyers.

22 7. A sale or lease of a lot, parcel or fractional interest occurs
23 ten or more years after the sale or lease of another lot, parcel or
24 fractional interest and the other lot, parcel or fractional interest is
25 not subject to this article and is treated as an independent parcel
26 unless, ~~upon~~ ON investigation by the commissioner, there is evidence of
27 intent to subdivide.

28 F. In areas outside of active management areas established pursuant
29 to title 45, chapter 2, article 2:

30 1. If the subdivision is located in a county that has adopted the
31 provision authorized by section 11-823, subsection A, **IN A RURAL**
32 **GROUNDWATER MANAGEMENT AREA FOR WHICH A RURAL GROUNDWATER MANAGEMENT AREA**
33 **COUNCIL HAS ADOPTED A MANDATORY ADEQUACY REQUIREMENT PURSUANT TO SECTION**
34 **45-441.13** or in a city or town that has enacted an ordinance pursuant to
35 section 9-463.01, subsection 0, the subdivider shall accompany the notice
36 with a report issued by the director of water resources pursuant to
37 section 45-108 stating that the subdivision has an adequate water supply,
38 unless one of the following applies:

39 (a) The subdivider submitted the report to a city, town or county
40 before approval of the plat by the city, town or county and this has been
41 noted on the face of the plat.

42 (b) The subdivider has obtained a written commitment of water
43 service for the subdivision from a city, town or private water company
44 designated as having an adequate water supply by the director of water
45 resources pursuant to section 45-108.

1 (c) The plat was approved pursuant to an exemption authorized by
2 section 9-463.01, subsection K, pursuant to an exemption authorized by
3 section 11-823, subsection ~~B~~ C, paragraph 1, pursuant to an exemption
4 granted by the director of water resources under section 45-108.02 and the
5 exemption has not expired or pursuant to an exemption granted by the
6 director under section 45-108.03. If the plat was approved pursuant to an
7 authorized exemption, the state real estate commissioner shall require
8 that all promotional material and contracts for the sale of lots in the
9 subdivision adequately display the following:

10 (i) The director of water resources' report or the developer's
11 brief summary of the report as approved by the commissioner on the
12 proposed water supply for the subdivision.

13 (ii) A statement describing the exemption under which the
14 subdivision was approved, including the specific conditions of the
15 exemption that were met. If the plat was approved by the legislative body
16 of a city or town pursuant to an exemption authorized by section 9-463.01,
17 subsection K or by the board of supervisors of a county pursuant to an
18 exemption authorized by section 11-823, subsection ~~B~~ C, paragraph 1, the
19 subdivider shall record the document required by section 33-406.

20 (d) The subdivision received final plat approval from the city,
21 town or county before the requirement for an adequate water supply became
22 effective in the city, town or county, and there have been no material
23 changes to the plat since the final plat approval. If changes were made
24 to the plat after the final plat approval, the director of water resources
25 shall determine whether the changes are material pursuant to the rules
26 adopted by the director to implement section 45-108. If this subdivision
27 applies, the state real estate commissioner shall require that all
28 promotional materials and contracts for the sale of lots in the
29 subdivision adequately display the director of water resources' report or
30 the developer's brief summary of the report as approved by the
31 commissioner on the proposed water supply for the subdivision.

32 2. If the subdivision is not located in a county that has adopted
33 the provision authorized by section 11-823, subsection A, [IN A RURAL
34 GROUNDWATER MANAGEMENT AREA IN WHICH A RURAL GROUNDWATER MANAGEMENT AREA
35 COUNCIL HAS ADOPTED A MANDATORY ADEQUACY REQUIREMENT PURSUANT TO SECTION
36 45-441.13](#) or in a city or town that has enacted an ordinance pursuant to
37 section 9-463.01, subsection 0, and if the director of water resources,
38 pursuant to section 45-108, reports an inadequate on-site supply of water
39 to meet the needs projected by the developer or if no water is available,
40 the state real estate commissioner shall require that all promotional
41 material and contracts for the sale of lots in subdivisions approved by
42 the commissioner adequately display the director of water resources'
43 report or the developer's brief summary of the report as approved by the
44 commissioner on the proposed water supply for the subdivision.

1 G. The commissioner may require the subdivider to supplement the
2 notice of intention to subdivide lands and may require the filing of
3 periodic reports to update the information contained in the original
4 notice of intention to subdivide lands.

5 H. The commissioner may authorize the subdivider to file as the
6 notice of intention to subdivide lands, in lieu of some or all of the
7 requirements of subsection A of this section, a copy of the statement of
8 record filed with respect to the subdivision pursuant to the federal
9 interstate land sales full disclosure act if the statement complies with
10 the requirements of the act and the regulations pertinent to the act.

11 I. ~~Neither~~ A real estate sales contract, conveyance, lease,
12 assignment or other instrument to transfer any interest in subdivided land
13 ~~nor~~ AND any covenant or restriction affecting real property shall NOT

18 official acts affecting real property, whether the property is located
19 within or outside of the boundaries of the subdivision. All contractual
20 provisions that conflict with this subsection are declared to be contrary
21 to public policy. ~~Nothing contained in~~ This subsection ~~shall~~ DOES NOT

31 completed within the portion of the subdivision containing these lots, if
32 the improvements can be used and maintained separately from the

13 commissioner or has engaged in any unlawful practice as defined in section
14 44-1522 with respect to the sale of subdivided lands or deviated from the
15 provisions of the public report, the commissioner may investigate the
16 subdivision project and examine the books and records of the subdivider.
17 For the purpose of examination, the subdivider shall keep and maintain
18 records of all sales transactions and funds received by the subdivider
19 pursuant to the sales transactions and shall make them accessible to the
20 commissioner on reasonable notice and demand.

2 to the superior court, ex parte, for an order appointing a receiver of the
3 assets of the person or for a writ of ne exeat, or both.

8 require the appointment of a receiver or the issuance of a writ of ne
9 exeat without notice, the court shall issue an order appointing the
10 receiver or issue the writ, or both. If the court determines that the
11 interests of the public will not be harmed by the giving of notice, the
12 court shall set a time for a hearing and require notice be given as the
13 court deems satisfactory.

14 P. If the court appoints a receiver without notice, the court shall
15 further direct that a copy of the order appointing a receiver be served on

17 under this article by delivering the order to the last address of the
18 person that is on file with the state real estate department. The order
19 shall inform the person that the person has the right to request a hearing
20 within ten days after the date of the order and, if requested, the hearing
21 shall be held within thirty days after the date of the order.

19 GROUNDWATER WITHDRAWN OR USED ANNUALLY OVER THE TEN YEARS BEFORE THE DATE
20 OF INITIATION. FOR THE PURPOSES OF CALCULATING THE AVERAGE PURSUANT TO
21 THIS PARAGRAPH, THE DIRECTOR SHALL USE ONLY THOSE YEARS IN WHICH
22 GROUNDWATER FOR IRRIGATION WAS ACTUALLY WITHDRAWN. THE AVERAGE AMOUNT OF
23 GROUNDWATER USED MAY BE DEMONSTRATED BY USING ANY OF THE FOLLOWING:

25 DIRECTOR PURSUANT TO SECTION 45-604.

26 (b) A CALCULATION OF THE AVERAGE AMOUNT OF WATER THAT IS REQUIRED
27 TO IRRIGATE THE CROPS HISTORICALLY GROWN IN THE FARM UNIT BASED ON THE
28 TOTAL IRRIGATION REQUIREMENT PER ACRE OF THE HISTORICALLY GROWN CROPS AND
29 A REASONABLE IRRIGATION EFFICIENCY FOR THE FARM UNIT AFTER FACTORING IN
30 THE HISTORIC CONDITIONS AND INFRASTRUCTURE.

31 (c) ANY OTHER METHOD THE DIRECTOR DETERMINES TO BE REASONABLE.

32 2. FOR NON-IRRIGATION USES, EVIDENCE OF THE HIGHEST AMOUNT OF
33 GROUNDWATER WITHDRAWN OR USED IN ANY YEAR IN THE FIVE YEARS BEFORE THE
34 DATE OF INITIATION. THE AVERAGE AMOUNT OF GROUNDWATER USED MAY BE
35 DEMONSTRATED BY USING DATA FROM A WATER MEASURING DEVICE APPROVED BY THE
36 DIRECTOR PURSUANT TO SECTION 45-604 OR ANY OTHER METHOD THE DIRECTOR
37 DETERMINES TO BE REASONABLE.

38 3. FOR MUNICIPAL USES, THE GROUNDWATER DEMAND ASSOCIATED WITH PLATS
39 RECORDED BEFORE THE DATE OF INITIATION AND DETERMINATIONS OF AN ADEQUATE
40 WATER SUPPLY ISSUED PURSUANT TO SECTION 45-108 BEFORE THE DATE OF
41 INITIATION THAT IS NOT INCLUDED AS NON-IRRIGATION USE.

42 4. EVIDENCE OF A SUBSTANTIAL CAPITAL INVESTMENT IN FUTURE
43 GROUNDWATER USE AS PRESCRIBED BY THIS SECTION AND EVIDENCE OF A REASONABLE
44 VOLUME OF GROUNDWATER LIKELY TO BE USED FOR THAT PURPOSE.

1 5. FOR ANY GROUNDWATER USE INITIATED LESS THAN TWELVE MONTHS BEFORE
2 THE DATE OF INITIATION, A REASONABLE ESTIMATE OF THE AMOUNT OF GROUNDWATER
3 THAT IS EXPECTED TO BE USED IN A TWELVE-MONTH PERIOD BASED ON THE PERSON'S
4 GROUNDWATER USE AS OF THE DATE OF INITIATION.

5 6. EVIDENCE OF A VARIANCE FROM THE TEN-YEAR HISTORICAL AVERAGE USE
6 DUE TO TEMPORARY CONSERVATION EFFORTS DURING THE TEN-YEAR PERIOD.

7 C. FOR THE PURPOSES OF THIS SECTION, SUBSTANTIAL CAPITAL INVESTMENT
8 IN FUTURE GROUNDWATER USE:

9 1. DOES NOT INCLUDE:

10 (a) COSTS THAT ARE ASSOCIATED WITH THE PURCHASE OF LAND ON WHICH
11 GROUNDWATER IS TO BE WITHDRAWN OR USED.

12 (b) COSTS THAT ARE ASSOCIATED WITH THE APPLICATION FOR A
13 CERTIFICATE OF GROUNDWATER USE.

14 2. MAY INCLUDE ONE OR MORE OF THE FOLLOWING:

15 (a) FOR IRRIGATION USE, COSTS THAT ARE RELATED TO THE SUBJUGATION
16 OF LAND FOR IRRIGATION USE, INCLUDING ON-SITE IRRIGATION DISTRIBUTION
17 FACILITIES AND A WELL OR WELLS, IF THE DRILLING AND CONSTRUCTION WERE
18 SUBSTANTIALLY COMMENCED BEFORE THE DATE OF INITIATION. THE DIRECTOR MAY
19 CONSIDER REASONABLE ESTIMATES OF THE LIKELY COST OF THE APPLICANT'S OWN
20 LABOR HAD THE APPLICANT CONTRACTED FOR THOSE SERVICES.

21 (b) FOR NON-IRRIGATION USES, COSTS THAT ARE RELATED TO ONE OR MORE
22 OF THE FOLLOWING:

23 (i) THE ACQUISITION OF PERMITS AND APPROVALS, INCLUDING LEGAL,
24 TECHNICAL AND ENVIRONMENTAL SERVICES THAT ARE REQUIRED TO OBTAIN THE
25 AUTHORIZATION TO PROCEED WITH THE PROJECT.

26 (ii) THE ACQUISITION OR LEASE OF LAND FOR PURPOSES OF
27 RIGHTS-OF-WAY.

37 except as provided in article 8.1 of this chapter.

38 2. Transport groundwater pursuant to articles 8 and 8.1 of this
39 chapter.

4 A. Withdrawals of groundwater for non-irrigation uses from wells
5 having a pump with a maximum capacity of not more than thirty-five gallons
6 per minute ~~which~~ THAT were drilled before April 28, 1983 or ~~which~~ THAT
7 were drilled after April 28, 1983 pursuant to a notice of intention to
8 drill ~~which~~ THAT was on file with the department on such date are exempt
9 from this chapter, except that:

10 1. Wells drilled before June 12, 1980 ~~which~~ THAT are not abandoned

12 which a notice of intention to drill was on file with the Arizona water
13 commission on such date are subject to subsections J, K and L of this
14 section and must be registered pursuant to section 45-593. If two or more
15 wells in an active management area OR RURAL GROUNDWATER MANAGEMENT AREA
16 are exempt under this paragraph and are used to serve the same
17 non-irrigation use at the same location, the aggregate quantity of
18 groundwater withdrawn from the wells shall not exceed fifty-six acre-feet
19 per year.

20 2. Wells drilled between June 12, 1980 and April 28, 1983, except

29 file with the department on such date, are exempt from this chapter,
30 except that:

31 1. Such wells are subject to subsections G through K of this
32 section.

33 2. In an active management area OR RURAL GROUNDWATER MANAGEMENT
34 AREA, other than a subsequent active management area OR RURAL GROUNDWATER
35 MANAGEMENT AREA designated for a portion of a groundwater basin in the
36 regional aquifer systems of northern Arizona, withdrawals of groundwater
37 from such wells for non-irrigation uses other than domestic purposes and
38 stock watering shall not exceed ten acre-feet per year.

39 3. In a subsequent active management area that is designated for a
40 portion of a groundwater basin in the regional aquifer systems of northern
41 Arizona, groundwater withdrawn from such wells may be used only for
42 domestic purposes and stock watering.

43 C. On or after January 1, 2006, an exempt well otherwise allowed by
44 this section may not be drilled on land if any part of the land is within
45 one hundred feet of the operating water distribution system of a municipal

1 provider with an assured water supply designation within the boundaries of
2 an active management area established on or before July 1, 1994, as shown
3 on a digitized service area map provided to the director by the municipal
4 provider and updated by the municipal provider as specified by the
5 director.

6 D. On request from the owner of the land on which an exempt well is
7 prohibited pursuant to subsection C of this section on a form prescribed
8 by the director, the director shall issue an exemption from subsection C
9 of this section if the landowner demonstrates to the satisfaction of the
10 director that any of the following applies:

11 1. The landowner submitted a written request for service to the
12 municipal provider that operates the distribution system and the municipal
13 provider did not provide written verification to the landowner within
14 thirty calendar days after ~~receipt of~~ RECEIVING the request that water
15 service is available to the landowner after payment of any applicable fee
16 to the municipal provider.

17 2. The total capital cost and fees for connecting to the operating
18 water distribution system exceed the total capital cost and fees for
19 drilling and fully equipping an exempt well.

20 3. If the applicant must obtain an easement across other land to
21 connect to the water distribution system of the municipal provider, the
22 applicant sent the owner of the land a request for the easement by
23 certified mail, return receipt requested, and either the applicant did not
24 receive a response to the request within thirty calendar days of mailing
25 the request or the request was denied.

26 4. The landowner does not qualify for an exemption pursuant to
27 paragraph 1, 2 or 3 of this subsection and the landowner provides written
28 verification from the municipal provider that the landowner shall not
29 receive or request water service from the municipal provider while the
30 exempt well is operational. The exemption for that well is revoked if the
31 landowner or any subsequent landowner receives water service from the
32 municipal provider. In determining whether to approve or reject a permit
33 application filed under section 45-599, the director shall not consider
34 any impacts the proposed well may have on an exempt well drilled pursuant
35 to this paragraph.

36 E. This section does not prohibit a property owner, after January
37 1, 2006, from drilling a replacement exempt well for a lawful exempt well
38 if the replacement well does not increase the total number of operable
39 exempt wells on the applicant's land.

40 F. A remediation well drilled for the purpose of remediating
41 groundwater is exempt from this section if it meets one of the following:

42 1. The remediation well is for an approved department of
43 environmental quality or United States environmental protection agency
44 remediation program.

1 2. A registered geologist certifies that the remediation well is
2 for the purpose of remediation.

3 G. A person shall file a notice of intention to drill with the
4 director pursuant to section 45-596 before drilling an exempt well or
5 causing an exempt well to be drilled.

6 H. The registered well owner shall file a completion report
7 pursuant to section 45-600, subsection B.

8 I. In an active management area **AND RURAL GROUNDWATER MANAGEMENT**
9 **AREA** only one exempt well may be drilled or used to serve the same
10 non-irrigation use at the same location, except that a person may drill or
11 use a second exempt well to serve the same non-irrigation use at the same
12 location if the director determines that all of the following apply:

13 1. Because of its location, the first exempt well is not capable of
14 consistently producing more than three gallons per minute of groundwater
15 when equipped with a pump with a maximum capacity of thirty-five gallons
16 per minute.

17 2. The second exempt well is located on the same parcel of land as
18 the first exempt well, the parcel of land is at least one acre in size,
19 all groundwater withdrawn from both exempt wells is used on that parcel of
20 land and there are no other exempt wells on that parcel of land.

21 3. Combined withdrawals from both wells do not exceed five
22 acre-feet per year.

23 4. If the second exempt well is drilled after January 1, 2000, the
24 county health authority for the county in which the well is located or any
25 other local health authority that controls the installation of septic
26 tanks or sewer systems in the county has approved the location of the well
27 in writing after physically inspecting the well site.

28 5. Use of two wells for the same non-irrigation use at the same
29 location is not contrary to the health and welfare of the public.

30 J. An exempt well is subject to sections 45-594 and 45-595.

31 K. Groundwater withdrawn from an exempt well may be transported
32 only pursuant to articles 8 and 8.1 of this chapter.

33 L. A person who owns land from which exempt withdrawals were being
34 made as of the date of the designation of the active management area is
35 not eligible for a certificate of grandfathered right for a type 2
36 non-irrigation use for such withdrawals.

37 **M. A PERSON WHO OWNS LAND FROM WHICH EXEMPT WITHDRAWALS WERE BEING**
38 **MADE AS OF THE DATE OF THE DESIGNATION OF A RURAL GROUNDWATER MANAGEMENT**
39 **AREA IS NOT ELIGIBLE FOR A CERTIFICATE OF GROUNDWATER USE FOR SUCH**
40 **WITHDRAWALS.**

41 ~~M.~~ N. For the purposes of this section:

42 1. "Domestic purposes" means uses related to the supply, service
43 and activities of households and private residences and includes the
44 application of water to less than two acres of land to produce plants or
45 parts of plants for sale or human consumption, or for use as feed for

1 livestock, range livestock or poultry, as such terms are defined in
2 section 3-1201.

3 2. "Municipal provider" means a city, town, private water company
4 or irrigation district that supplies water for non-irrigation use.

7 Sec. 13. Section 45-596, Arizona Revised Statutes, is amended to
8 read:

9 45-596. Notice of intention to drill; fee

10 A. In an area not subject to active management **OR THE JURISDICTION**
11 **OF A RURAL GROUNDWATER MANAGEMENT AREA COUNCIL ESTABLISHED PURSUANT TO**
12 **ARTICLE 3.1 OF THIS CHAPTER**, a person may not drill or cause to be drilled
13 any well or deepen an existing well without first filing notice of
14 intention to drill pursuant to subsection C of this section or obtaining a
15 permit pursuant to section 45-834.01. Only one notice of intention to
16 drill is required for all wells that are drilled by or for the same person
17 to obtain geophysical, mineralogical or geotechnical data within a single
18 section of land.

19 B. In an active management area **OR RURAL GROUNDWATER MANAGEMENT**
20 **AREA**, a person may not drill or cause to be drilled an exempt well, a
21 replacement well in approximately the same location or any other well for
22 which a permit is not required under this article, article 7 of this
23 chapter or section 45-834.01 or deepen an existing well without first
24 filing a notice of intention to drill pursuant to subsection C of this
25 section. Only one notice of intention to drill is required for all wells
26 that are drilled by or for the same person to obtain geophysical,
27 mineralogical or geotechnical data within a single section of land.

28 C. A notice of intention to drill shall be filed with the director
29 on a form that is prescribed and furnished by the director and that shall
30 include:

- 31 1. The name and mailing address of the person filing the notice.
- 32 2. The legal description of the land on which the well is proposed
33 to be drilled and the name and mailing address of the owner of the land.
- 34 3. The legal description of the location of the well on the land.
- 35 4. The depth, diameter and type of casing of the proposed well.
- 36 5. Such legal description of the land on which the groundwater is
37 proposed to be used as may be required by the director to administer this
38 chapter.
- 39 6. When construction is to begin.
- 40 7. The proposed uses to which the groundwater will be applied.
- 41 8. The name and well driller's license number of the well driller
42 who is to construct the well.
- 43 9. The design pumping capacity of the well.
- 44 10. If for a replacement well, the maximum capacity of the original
45 well and the distance of the replacement well from the original well.

1 11. Proof that the director determines to be satisfactory that the
2 person proposing to construct the well holds a valid license issued by the
3 registrar of contractors pursuant to title 32, chapter 10 and that the
4 license is of the type necessary to construct the well described in the
5 notice of intention to drill. If the proposed well driller does not hold
6 a valid license, the director may accept proof that the proposed well
7 driller is exempt from licensing as prescribed by section 32-1121.

8 12. If any water from the proposed well will be used for domestic
9 purposes as defined in section 45-454, evidence of compliance with the
10 requirements of subsection F of this section.

11 13. If for a second exempt well at the same location for the same
12 use pursuant to section 45-454, subsection I, proof that the requirements
13 of that subsection are met.

14 14. If for a well to obtain geophysical, mineralogical or
15 geotechnical data within a single section of land, the information
16 prescribed by this subsection for each well that will be included in that
17 section of land before each well is drilled.

18 15. Such other information as the director may require.

19 D. On receiving a notice of intention to drill and the fee required
20 by subsection L of this section, the director shall endorse on the notice
21 the date of its receipt. The director shall then determine whether all
22 information that is required has been submitted and whether the
23 requirements of subsection C, paragraphs 11 and 12 and subsection I of
24 this section have been met. If so, within fifteen days ~~of~~ AFTER receipt
25 of the notice, or such longer time as provided in subsection J of this
26 section, the director shall record the notice, mail a drilling card that
27 authorizes the drilling of the well to the well driller identified in the
28 notice and mail written notice of the issuance of the drilling card to the
29 person filing the notice of intention to drill at the address stated in
30 the notice. On receipt of the drilling card, the well driller may proceed
31 to drill or deepen the well as described in the notice of intention to
32 drill. If the director determines that the required information has not
33 been submitted or that the requirements of subsection C, paragraphs 11 and
34 12 or subsection I of this section have not been met, the director shall
35 mail a statement of the determination to the person giving the notice to
36 the address stated in the notice, and the person giving the notice may not
37 proceed to drill or deepen the well.

38 E. The well shall be completed within one year after the date of
39 the notice unless the director approves a longer period of time pursuant
40 to this subsection. If the well is not completed within one year or
41 within the time approved by the director pursuant to this subsection, the
42 person shall file a new notice before proceeding with further
43 construction. At the time the drilling card for the well is issued, the
44 director may provide for and approve a completion period that is greater

1 than one year but not to exceed five years from the date of the notice if
2 both of the following apply:

3 1. The proposed well is a nonexempt well within an active
4 management area OR RURAL GROUNDWATER MANAGEMENT AREA and qualifies as a
5 replacement well in approximately the same location as prescribed in rules
6 adopted by the director pursuant to section 45-597.

7 2. The applicant has submitted evidence that demonstrates one of
8 the following:

9 (a) This state or a political subdivision of this state has
10 acquired or has begun a condemnation action to acquire the land on which
11 the original well is located.

12 (b) The original well has been rendered inoperable due to flooding,
13 subsidence or other extraordinary physical circumstances that are beyond
14 the control of the well owner.

15 F. If any water from a proposed well will be used for domestic
16 purposes as defined in section 45-454 on a parcel of land of five or fewer
17 acres, the applicant shall submit a well site plan of the property with
18 the notice of intention to drill. The site plan shall:

19 1. Include the county assessor's parcel identification number.

20 2. Show the proposed well location and the location of any septic
21 tank or sewer system that is either located on the property or within one
22 hundred feet of the proposed well site.

23 3. Show written approval by the county health authority that
24 controls the installation of septic tanks or sewer systems in the county,
25 or by the local health authority in areas where the authority to control
26 installation of septic tanks or sewer systems has been delegated to a
27 local authority. In areas where there is no local or county authority
28 that controls the installation of septic tanks or sewer systems, the
29 applicant shall apply for approval directly to the department of water
30 resources.

31 G. Before approving a well site plan submitted pursuant to
32 subsection F of this section, the county or local health authority or the
33 department of water resources, as applicable, pursuant to subsection F of
34 this section, shall review the well site plan and determine whether the
35 proposed well location complies with applicable local laws, ordinances and
36 regulations and any laws or rules adopted under this title and title 49
37 regarding the placement of wells and the proximity of wells to septic
38 tanks or sewer systems. If the health authority or the department of
39 water resources, as applicable, pursuant to subsection F of this section,
40 finds that the proposed well location complies with this title and title
41 49 and with local requirements, it shall endorse the site plan and the
42 proposed well placement in a manner indicating approval. On endorsement,
43 the director of water resources shall approve the construction of the
44 well, if all remaining requirements have been met. If the health
45 authority is unable to determine whether the proposed well location

1 complies with this title and title 49 and local requirements, it shall
2 indicate this on the site plan and the decision to approve or reject the
3 proposed construction rests with the director of water resources. If
4 parcel size, geology or location of improvements on the property prevents
5 the well from being drilled in accordance with this title and title 49 or
6 local requirements, the property owner may apply for a variance. The
7 property owner shall make the request for a variance to the county or
8 local authority if a county or local law, ordinance or regulation prevents
9 the proposed construction. If a law or rule adopted under this title or
10 title 49 prevents the proposed construction, the property owner shall make
11 the request for a variance directly to the department of water resources.
12 The request for a variance shall be in the form and shall contain the
13 information that the department of water resources, county or local
14 authority may require. The department of water resources, or the county
15 or local authority whose law, ordinance or regulation prevents the
16 proposed construction, may expressly require that a particular variance
17 shall include certification by a registered professional engineer or
18 geologist that the location of the well will not pose a health hazard to
19 the applicant or surrounding property or inhabitants. If all necessary
20 variances are obtained, the director of water resources shall approve the
21 construction of the well if all remaining requirements have been met.

22 H. If a well that was originally drilled as an exploration well, a
23 monitor well or a piezometer well or for any use other than domestic use
24 is later proposed to be converted to use for domestic purposes as defined
25 in section 45-454, the well owner shall file a notice of intention to
26 drill and shall comply with this section before the well is converted and
27 any water from that well is used for domestic purposes.

28 I. Except as prescribed in subsection K of this section, the
29 director shall not approve the drilling of the well if the director
30 determines that the well will likely cause the migration of contaminated
31 groundwater from a remedial action site to another well, resulting in
32 unreasonably increasing damage to the owner of the well or persons using
33 water from the well. In making this determination, the director of water
34 resources shall follow the applicable criteria in the rules adopted by the
35 director of water resources pursuant to section 45-598, subsection A and
36 shall consult with the director of environmental quality. For the
37 purposes of this subsection:

38 1. "Contaminated groundwater" means groundwater that has been
39 contaminated by a release of a hazardous substance, as defined in section
40 49-201, or a pollutant, as defined in section 49-201.

41 2. "Remedial action site" means any of the following:

42 (a) The site of a remedial action undertaken pursuant to the
43 comprehensive environmental response, compensation, and liability act of
44 1980, as amended (P.L. 96-510; 94 Stat. 2767; 42 United States Code
45 sections 9601 through 9657), commonly known as "superfund".

1 (b) The site of a corrective action undertaken pursuant to title
2 49, chapter 6.

3 (c) The site of a voluntary remediation action undertaken pursuant
4 to title 49, chapter 1, article 5.

5 (d) The site of a remedial action undertaken pursuant to title 49,
6 chapter 2, article 5, including mitigation of a nonhazardous release
7 undertaken pursuant to an order issued by the department of environmental
8 quality pursuant to section 49-286.

9 (e) The site of a remedial action undertaken pursuant to the
10 resource conservation and recovery act of 1976 (P.L. 94-580; 90 Stat.
11 2795; 42 United States Code sections 6901 through 6992).

12 (f) The site of remedial action undertaken pursuant to the
13 department of defense environmental restoration program (P.L. 99-499; 100
14 Stat. 1719; 10 United States Code section 2701).

15 J. Except as prescribed in subsection K of this section, the
16 director shall approve or deny the drilling of a well within forty-five
17 days after receipt of the notice of intention to drill if one of the
18 following applies:

19 1. The proposed well is located within a remedial action site.

20 2. The proposed well is located within one mile of any of the
21 following remedial action sites:

22 (a) A remedial action undertaken pursuant to title 49, chapter 2,
23 article 5, including mitigation of a nonhazardous release undertaken
24 pursuant to an order issued by the department of environmental quality
25 pursuant to section 49-286.

26 (b) A remedial action undertaken pursuant to the comprehensive
27 environmental response, compensation, and liability act of 1980, as
28 amended (P.L. 96-510; 94 Stat. 2767; 42 United States Code sections 9601
29 through 9657), commonly known as "superfund".

5 agrees in writing to use the water delivered to the facility on a
6 gallon-for-gallon substitute basis directly in lieu of groundwater that
7 otherwise would have been pumped from within the active management area,
8 ~~or~~ irrigation non-expansion area OR RURAL GROUNDWATER MANAGEMENT AREA.

9 3. The in lieu water is the only reasonably available source of
10 water for the recipient other than groundwater pumped from within the same
11 active management area, ~~or~~ irrigation non-expansion area OR RURAL
12 GROUNDWATER MANAGEMENT AREA in which the groundwater savings facility is
13 located.

14 4. The water delivered as in lieu water would not have been a
15 reasonable alternative source of water for the recipient except through
16 the operation of the groundwater savings facility.

17 5. The water delivered to the recipient as in lieu water was not
18 delivered before October 1, 1990.

19 6. The applicant has submitted a plan satisfactory to the director
20 that describes how the applicant will prove the quantity of groundwater
21 saved at the facility each year and what evidence will be submitted with
22 the applicant's annual report as required by section 45-875.01 to prove
23 the groundwater savings. The plan may rely on the following factors:

24 (a) The recipient's cost of pumping groundwater relative to the
25 cost of in lieu water and alternative sources of water available to the
26 recipient.

27 (b) The historic quantity of groundwater pumped by the recipient at
28 the location of the intended use of the in lieu water.

29 (c) The recipient's anticipated demand for groundwater and
30 anticipated total demand for water, including groundwater.

31 (d) The recipient's legal right to withdraw or use groundwater
32 pursuant to chapter 2 of this title.

33 (e) The amount of central Arizona project water for which the
34 recipient anticipates accepting delivery.

35 (f) The historic amount of power used to pump groundwater at the
36 groundwater savings facility compared to the power used during a year in
37 which the recipient received in lieu water.

38 (g) The factors that prevent the recipient from using the water
39 delivered as in lieu water without the operation of the groundwater
40 savings facility.

41 (h) Any other criteria the director may deem to be relevant.

1 Sec. 22. Section 45-831.01, Arizona Revised Statutes, is amended to
2 read:

3 45-831.01. Water storage permits

4 A. A person may apply to the director for a water storage permit
5 and may store water at a storage facility only pursuant to a water storage
6 permit.

7 B. The director may issue a water storage permit to store water at
8 a storage facility if the director determines that all of the following
9 apply:

10 1. The applicant has a right to use the proposed source of water.
11 Any determination made by the director for purposes of this subsection
12 regarding the validity, nature, extent or relative priority of a water
13 right claimed by the applicant or another person is not binding in any
14 other administration proceeding or in any judicial proceeding.

15 2. The applicant has applied for any water quality permit required
16 by the department of environmental quality under title 49, chapter 2,
17 article 3 and by federal law.

18 3. The water storage will occur at a permitted storage facility.

19 C. In addition to the requirements of subsection B of this section,
20 if the applicant has applied for a water storage permit to store water at
21 a groundwater savings facility, the director shall not issue the water
22 storage permit unless the applicant has agreed in writing to comply with
23 the plan by which the quantity of groundwater saved at the facility will
24 be proved each year.

25 D. If the director issues a water storage permit, the director may
26 make, if possible, the following determinations:

27 1. Whether the water to be stored is water that cannot reasonably
28 be used directly by the applicant and otherwise meets the requirements of
29 section 45-852.01 for long-term storage credits.

30 2. If use of the water to be stored is appurtenant to a particular
31 location, and if so, where the water may be legally used after recovery.
32 Any determination made by the director for purposes of this subsection
33 regarding the validity, nature, extent or relative priority of a water
34 right claimed by the applicant or another person is not binding in any
35 other administrative proceeding or in any judicial proceeding.

36 E. The director may issue a water storage permit for a period of
37 not more than fifty years, except that:

38 1. On request of the holder of the permit, the director may renew
39 the permit if the director determines that the requirements of subsection
40 B of this section apply and, if the requirement of subsection C of this
41 section applied at the time of issuance, that the requirement of
42 subsection C of this section applies at the time of renewal.

43 2. Subject to the provisions of this chapter, the holder of
44 long-term storage credits earned pursuant to the permit may recover the
45 water over a period longer than the duration of the permit.

1 F. The holder of a water storage permit may apply to the director
2 for approval to convey the permit to another person. The director may
3 approve the conveyance if the director determines that the person to whom
4 the permit is to be conveyed and the water storage will continue to meet
5 the applicable requirements of this section. If long-term storage credits
6 accrued pursuant to the water storage permit are being assigned pursuant
7 to section 45-854.01 with the water storage permit, the director shall be
8 given notice of the impending assignment of long-term storage credits at
9 the time the holder of the water storage permit applies to convey the
10 permit.

11 G. A person who holds a water storage permit may apply to the
12 director on a form approved by the director for a modification of that
13 water storage permit. The director may modify the permit within twenty
14 days ~~of~~ AFTER receiving the application without complying with section
15 45-871.01 if all of the following apply:

16 1. The holder of the storage facility permit with which the water
17 storage permit is affiliated has consented to the modification.

18 2. The modification to the water storage permit does not require a
19 modification of the affiliated water storage facility permit.

20 3. The only modification requested is to add an amount of Colorado
21 river water as a type of water to be stored under the water storage
22 permit.

23 4. Water storage of Colorado river water has previously been
24 permitted at the affiliated storage facility.

25 5. The person requesting the modification has the right to use the
26 Colorado river water.

27 H. A water storage permit shall include the following information:

28 1. The name and mailing address of the person to whom the permit is
29 issued.

30 2. The storage facility where the water storage will occur and the
31 name of the active management area, RURAL GROUNDWATER MANAGEMENT AREA,
32 irrigation non-expansion area, groundwater basin or groundwater ~~sub-basin~~
33 SUBBASIN, as applicable, in which that facility is located.

34 3. The maximum annual amount of water that may be stored.

35 4. If the applicable finding of subsection D of this section has
36 been made, whether the water to be stored is water that cannot reasonably
37 be used directly by the applicant.

38 5. If the applicable finding of subsection D of this section has
39 been made, any restrictions on where the water to be stored may legally be
40 used.

41 6. Other conditions consistent with this chapter.

42 7. The duration of the permit.

43 I. If the water storage will occur at a groundwater savings
44 facility, the water storage permit shall include, in addition to the
45 information required by subsection H of this section, the requirements of

1 the plan by which the quantity of groundwater saved at the storage
2 facility will be proved each year.

3 J. If the director of the department of water resources decides to
4 issue a water storage permit and the applicant has not received a water
5 quality permit required by the department of environmental quality under
6 title 49, chapter 2, article 3 and by federal law, the director of the
7 department of water resources shall make receipt of the water quality
8 permit a condition of the water storage permit and the holder of the water
9 storage permit shall not store water until receiving the water quality
10 permit.

11 Sec. 23. Section 45-832.01, Arizona Revised Statutes, is amended to
12 read:

13 45-832.01. Use of stored water

14 A. Water that has been stored pursuant to a water storage permit
15 may be used or exchanged only in the manner in which it was permissible to
16 use or exchange the water before it was stored.

17 B. Water that has been stored pursuant to a water storage permit
18 may be used only in the location in which it was permissible to use the
19 water before it was stored.

20 C. Water that has been stored pursuant to a water storage permit
21 may be used for replenishment purposes only in the active management area
22 OR RURAL GROUNDWATER MANAGEMENT AREA in which the water is stored, unless
23 the water is recovered and transported to another active management area
24 OR RURAL GROUNDWATER MANAGEMENT AREA.

25 D. Stored water may be used only as follows:

26 1. The water may be recovered by the storer and used on an annual
27 basis in accordance with section 45-851.01.

28 2. The water may be credited to the storer's long-term storage
29 account, if the water meets the requirements of section 45-852.01, and the
30 long-term storage credits may be used in accordance with ~~the provisions of~~
31 this chapter.

32 3. A district that is storing water may have the stored water
33 credited to its master replenishment account, if the water would meet the
34 requirements of long-term storage credits as prescribed by section
35 45-852.01.

36 4. A conservation district that is storing water may have the
37 stored water credited to its conservation district account, if the water
38 would meet the requirements of long-term storage credits as prescribed by
39 section 45-852.01.

40 5. A water district that is storing water may have the stored water
41 credited to its water district account, if the water would meet the
42 requirements of long-term storage credits as prescribed by section
43 45-852.01.

1 Sec. 24. Section 45-834.01, Arizona Revised Statutes, is amended to
2 read:

3 45-834.01. Recovery of stored water; recovery well permit;
4 emergency temporary recovery well permit; well
5 construction

6 A. A person who holds long-term storage credits or who may recover
7 water on an annual basis may recover the water stored pursuant to a water
8 storage permit only:

9 1. If the person seeking to recover stored water has applied for
10 and received a recovery well permit under this article.

11 2. For water stored within an active management area **OR RURAL**
12 **GROUNDWATER MANAGEMENT AREA**, if one of the following applies:

13 (a) The proposed recovery well is located within the area of impact
14 of the stored water, as determined by the director, and either the person
15 recovering the water is the storer or the stored water to be recovered is
16 Colorado River water. If the stored water to be recovered is effluent
17 that is stored in a managed underground storage facility and if the
18 proposed recovery well is not an already constructed well owned by the
19 person recovering the water and is located within the exterior boundaries
20 of the service area of a city, town, private water company or irrigation
21 district, that city, town, private water company or irrigation district
22 must be notified by the person recovering the stored water and must have
23 the right to offer to recover the water stored on behalf of that person.
24 If the city, town, private water company or irrigation district offers to
25 recover the water on behalf of the person seeking recovery and the water
26 that is offered for recovery is of comparable quality to the water that
27 the person could recover, the person seeking to recover the water shall
28 consider accepting the best offer from the city, town, private water
29 company or irrigation district overlying the area of impact that has
30 offered to recover the stored water.

31 (b) The proposed recovery well is located outside the area of
32 impact of the stored water, as determined by the director, and all of the
33 following apply:

34 (i) The proposed recovery well is located within the same active
35 management area **OR RURAL GROUNDWATER MANAGEMENT AREA** as storage.

36 (ii) The director determines that recovery at the proposed location
37 is consistent with the management plan and achievement of the management
38 goal for the active management area **OR RURAL GROUNDWATER MANAGEMENT AREA**.

39 (iii) If the proposed recovery well is located within the exterior
40 boundaries of the service area of a city, town, private water company or
41 irrigation district, that city, town, private water company or irrigation
42 district is the person seeking to recover the water or has consented to
43 the location of the recovery well.

44 (iv) If the proposed recovery well is located outside, but within
45 three miles of, the exterior boundaries of the service area of a city,

1 town, private water company or irrigation district, the closest city,
2 town, private water company or irrigation district has consented to the
3 location of the recovery well.

4 (c) The proposed recovery well is located within the area of impact
5 of the stored water, as determined by the director, the person recovering
6 the water is not the storer, the stored water to be recovered is not
7 Colorado River water and all of the conditions prescribed by subdivision
8 (b), items (i) through (iv) of this paragraph are met.

9 3. For water stored outside of an active management area OR RURAL
10 GROUNDWATER MANAGEMENT AREA, if recovery will occur within the same
11 irrigation non-expansion area, groundwater basin or groundwater ~~sub-basin~~
12 SUBBASIN, as applicable, in which the water was stored.

13 B. Before recovering from any well water stored pursuant to a water
14 storage permit, a person shall apply for and receive a recovery well
15 permit from the director. The director shall issue the recovery well
16 permit if the director determines that:

17 1. If the application is for a new well, as defined in section
18 45-591, or except as provided in paragraphs 2 and 3 of this subsection for
19 an existing well, as defined in section 45-591, the proposed recovery of
20 stored water will not unreasonably increase damage to surrounding land or
21 other water users from the concentration of wells. The director shall
22 make this determination pursuant to rules adopted by the director.

23 2. If the applicant is a city, town, private water company or
24 irrigation district in an active management area OR RURAL GROUNDWATER
25 MANAGEMENT AREA and the application is for an existing well within the
26 service area of the city, town, private water company or irrigation
27 district, the applicant has a right to use the existing well.

28 3. If the applicant is a conservation district and the application
29 is for an existing well within the conservation district and within the
30 groundwater basin or ~~sub-basin~~ SUBBASIN in which the stored water is
31 located, the applicant has a right to use the existing well.

32 C. A city, town, private water company or irrigation district in an
33 active management area OR RURAL GROUNDWATER MANAGEMENT AREA may apply with
34 a single application to the director to have all existing wells, as
35 defined in section 45-591, that the applicant has the right to use within
36 its service area listed as recovery wells on the recovery well permit, if
37 those wells otherwise meet the requirements of this section.

38 D. If the applicant is a conservation district, the director may
39 issue an emergency temporary recovery well permit without complying with
40 section 45-871.01, subsection F if the director determines that all of the
41 following apply:

1 1. The conservation district cannot reasonably continue to supply
2 central Arizona project water directly to a city, town, private water
3 company or irrigation district due to an unplanned failure of a portion of
4 the central Arizona project delivery system.

5 2. The emergency temporary recovery well permit is necessary to
6 allow the conservation district to provide immediate delivery of
7 replacement water to the city, town, private water company or irrigation
8 district.

9 3. The application is for an existing well as defined in section
10 45-591 that is within the groundwater basin or groundwater ~~sub-basin~~
11 **SUBBASIN** in which the stored water is located, is within the conservation
12 district and is within the service area of the city, town, private water
13 company or irrigation district.

14 E. An emergency temporary recovery well permit issued pursuant to
15 subsection D of this section may be issued for a period of up to ninety
16 days and may be extended for additional ninety day periods if the director
17 determines that the conditions prescribed in subsection D of this section
18 continue to apply.

19 F. If the application for a recovery well permit is approved, the
20 director shall issue a permit and the applicant may proceed to construct
21 or use the well. If the application is rejected, the applicant shall not
22 proceed to construct or use the well. A new well shall be completed
23 within one year of receipt of the permit, unless the director in granting
24 the permit approves a longer period to complete the well. If the well is
25 not completed within one year or the longer period approved by the
26 director, the applicant shall file a new application before proceeding
27 with construction.

28 G. A recovery well permit shall include the following information:

29 1. The name and mailing address of the person to whom the permit is
30 issued.

31 2. The legal description of the location of the existing well or
32 proposed new well from which stored water may be recovered pursuant to the
33 permit.

34 3. The purpose for which the stored water will be recovered.

35 4. The depth and diameter of the existing well or proposed new well
36 from which stored water may be recovered pursuant to the permit.

37 5. The legal description of the land on which the stored water will
38 be used.

39 6. The maximum pumping capacity of the existing well or proposed
40 new well.

41 7. If the permit is for a proposed new well, the latest date for
42 completing the proposed new well.

43 8. Any other information as the director may determine.

1 Sec. 25. Section 45-841.01, Arizona Revised Statutes, is amended to
2 read:

3 45-841.01. Accrual of long-term storage credits; Indian water
4 rights settlements

5 A. To further the implementation of Indian water rights settlements
6 in this state, an Indian community may accrue long-term storage credits as
7 prescribed by this section.

8 B. This section applies only to the settlement of a water rights
9 claim by a federally recognized Indian community in this state if the
10 settlement provides for off-reservation storage of its central Arizona
11 project water and only after the settlement results in a dismissal with
12 prejudice of a class action claim that has been pending in the United
13 States district court for more than five years.

14 C. Before accruing any long-term storage credits under this
15 section, both of the following conditions apply:

16 1. A party seeking to participate in the accrual of long-term
17 storage credits under this section shall file written notice with the
18 director that the requirements of subsection B of this section have been
19 met.

20 2. The director shall find that the requirements of subsection B of
21 this section have been met.

22 D. Before accruing any long-term storage credits under this
23 section, a party seeking to participate in the accrual of long-term
24 storage credits under this section shall file with the director all of the
25 following information:

26 1. A written notice of the party's intent to begin the delivery of
27 central Arizona project water that is available to the Indian community to
28 the holder of grandfathered groundwater rights in an active management
29 area **OR RURAL GROUNDWATER MANAGEMENT AREA.**

30 2. A sworn statement by the holder of the grandfathered groundwater
31 rights that the holder will use the water delivered off of Indian
32 community lands on a gallon-for-gallon substitute basis instead of
33 groundwater that otherwise would have been pumped pursuant to the
34 grandfathered groundwater rights **OR CERTIFICATE OF GROUNDWATER USE** from
35 within an active management area **OR RURAL GROUNDWATER MANAGEMENT AREA.**

36 3. A listing and description of the grandfathered groundwater
37 rights that will not be exercised by the holder because of the delivery of
38 the water that is delivered by the Indian community.

39 4. A hydrologic report assessing the effect of nonexercise of
40 grandfathered groundwater rights under this section on any underground
41 storage facility that was constructed as a state demonstration project and
42 that is located within ten miles of the point of withdrawal for the
43 grandfathered groundwater rights.

1 E. The director shall review the hydrologic report filed pursuant
2 to subsection D, paragraph 4 of this section and shall make such
3 modifications to the state demonstration project's underground storage
4 facility permit as the director deems appropriate.

5 F. If the director determines that the parties have complied with
6 subsection D of this section, the Indian community may begin accruing
7 long-term storage credits for the delivery of central Arizona project
8 water to the holder of the grandfathered groundwater rights, but only if
9 the following apply:

10 1. By March 31 of each year, the holder of the grandfathered
11 groundwater rights files an annual report with the director for the
12 preceding calendar year. The annual report shall include the following
13 information:

14 (a) The total quantity of water received from the Indian community
15 during the year for use by the holder under this section.

16 (b) A listing of those grandfathered groundwater rights that were
17 not exercised during the year by the holder because of the receipt of
18 central Arizona project water delivered by the Indian community.

19 (c) Such other information as the director may reasonably require.

20 2. The director finds that the water reported as received by the
21 grandfathered groundwater right holder was used on a gallon-for-gallon
22 substitute basis for groundwater.

23 3. The Indian community has offered to sell the Arizona water
24 banking authority ten ~~per cent~~ PERCENT of any long-term storage credits
25 accruable by the Indian community under this section at a price per
26 acre-foot at the time of sale equal to the authority's cost of delivering
27 and storing water at an underground storage facility that was constructed
28 as a state demonstration project and that is located within ten miles of
29 the point of withdrawal of any of the grandfathered groundwater rights
30 identified in the list filed with the director pursuant to subsection D,
31 paragraph 3 of this section, except that any credits purchased pursuant to
32 such offer may not be recovered within five miles of the exterior
33 reservation boundary of the Indian community.

34 G. The water that is received under this section by the holder of
35 the grandfathered groundwater right is deemed to be groundwater for all
36 purposes of chapter 2 of this title as if the holder had withdrawn it from
37 a well. The holder is responsible for all records, reports and fees
38 required by chapter 2 of this title relating to the water received.

39 H. The director shall establish a long-term storage account for the
40 Indian community in accordance with section 45-852.01 and each year shall
41 credit to that long-term storage account ninety-five ~~per cent~~ PERCENT of
42 the water received by the holder of the grandfathered groundwater right
43 during the preceding year that meets the requirements of subsection F of
44 this section.

1 I. Long-term storage credits accrued pursuant to this section may
2 be used or assigned in any manner that is consistent with this chapter.

3 J. The maximum amount of long-term storage credits that may be
4 accrued by an Indian community under this section in any year is ten
5 thousand acre-feet.

6 Sec. 26. Section 45-852.01, Arizona Revised Statutes, is amended to
7 read:

8 45-852.01. Long-term storage accounts

9 A. The director shall establish one long-term storage account for
10 each person holding long-term storage credits. The director shall
11 establish subaccounts within the long-term storage account according to
12 each active management area, **RURAL GROUNDWATER MANAGEMENT AREA**, irrigation
13 non-expansion area, groundwater basin or groundwater subbasin in which the
14 person's stored water is located. The long-term storage account shall be
15 further subdivided by type of water, if the person holds long-term storage
16 credits for more than one type of water.

17 B. Water stored pursuant to a water storage permit at a storage
18 facility may be credited to a long-term storage account if the director
19 determines that all of the following apply:

20 1. Either:

21 (a) The water that was stored was water that cannot reasonably be
22 used directly.

23 (b) The water was stored in a groundwater savings facility located
24 in an active management area **OR RURAL GROUNDWATER MANAGEMENT AREA** that
25 does not have a management goal of achieving or maintaining a safe yield
26 condition, the water was stored between January 1, 2020 and December 31,
27 2026 and the director determines that the storage assists in implementing
28 within this state a drought contingency plan for the lower basin of the
29 Colorado River. The total maximum amount that may qualify under this
30 subdivision is fifteen thousand acre-feet per year.

31 2. If the stored water was stored at a storage facility within an
32 active management area **OR RURAL GROUNDWATER MANAGEMENT AREA**, either:

33 (a) The water would not have been naturally recharged within the
34 active management area **OR RURAL GROUNDWATER MANAGEMENT AREA**.

35 (b) If the water was stored at a managed underground storage
36 facility that has been designated as a facility that could add value to a
37 national park, national monument or state park and the water stored is
38 effluent, the water stored is water that could have been used or disposed
39 of by the storer by means other than discharging the effluent into the
40 stream.

41 3. The stored water was not recovered on an annual basis pursuant
42 to section 45-851.01.

43 C. The director shall credit ninety-five percent of the recoverable
44 amount of stored water that meets the requirements of subsection B of this
45 section to the storer's long-term storage account, except that:

1 1. If the water was stored at a managed underground storage
2 facility that does not qualify as an existing effluent managed underground
3 storage facility and that had not been designated at the time of storage
4 as a facility that could add value to a national park, national monument
5 or state park and the water stored is effluent, the director shall credit
6 to the storer's long-term storage account fifty percent of the recoverable
7 amount of water that meets the requirements of subsection B of this
8 section. For storage of effluent in a managed underground storage
9 facility that is located in a recreational corridor channelization
10 district established pursuant to title 48, chapter 35, the director may
11 increase the storage credits earned from fifty percent to ninety-five
12 percent if both of the following apply:

13 (a) The effluent was not discharged into the stream where the
14 facility is located before the permit application for that facility was
15 filed.

16 (b) The director determines that the storage of effluent in the
17 facility will provide a greater benefit to aquifer conditions in the
18 active management area OR RURAL GROUNDWATER MANAGEMENT AREA or, if outside
19 an active management area OR RURAL GROUNDWATER MANAGEMENT AREA, to the
20 groundwater basin than would accrue to the active management area, RURAL
21 GROUNDWATER MANAGEMENT AREA or groundwater basin if the effluent is used
22 or disposed of in another manner.

23 2. If the water was stored at a groundwater savings facility and
24 the storer has not met the burden of proving that one hundred percent of
25 the in lieu water was used on a gallon-for-gallon substitute basis for
26 groundwater, the director shall credit to the storer's long-term storage
27 account only the percentage of the in lieu water that meets the
28 requirements of subsection B of this section and that was proven to the
29 director's satisfaction as being used on a gallon-for-gallon substitute
30 basis for groundwater.

31 3. The director shall credit to the storer's long-term storage
32 account ninety percent of the recoverable amount of the water that meets
33 the requirements of subsection B of this section if all of the following
34 apply:

35 (a) The stored water was central Arizona project water that
36 qualifies as water that cannot reasonably be used directly due solely to
37 the exclusion of groundwater withdrawn by the storer for mineral
38 extraction or metallurgical processing under section 45-802.01, paragraph
39 23, subdivision (c).

40 (b) The storer was engaged in mineral extraction and metallurgical
41 processing within an initial active management area on or before January
42 1, 2011.

43 (c) All exterior boundaries of the storage facility that is used to
44 store the stored water are more than twenty miles from a well owned by the

1 storer on January 1, 2012 and that well is not an exempt well and any one
2 or more of the following apply:

3 (i) The well is an existing well as defined in section 45-591,
4 paragraph 1.

5 (ii) The department has issued a permit for the well under section
6 45-599, subsection C.

7 (iii) The well was drilled pursuant to a mineral extraction and
